CORE SKILLS

LANGUAGES

Python | JavaScript | C++ | PyTorch | SQL

VISION & DEEP LEARNING

Real-time detection (YOLO / RF-DETR) | ViT distillation | OpenVINO | LoRA | Stereo vision | 3D perception | Synthetic data (SDXL / SAM2)

EDGE & ROBOTICS

Nvidia Jetson Orin | GStreamer | ROS 2 / MoveIt | OpenCV | MQTT

MLOPS & CLOUD

Docker | FastAPI | AWS | Google Cloud | Git | CI/CD

LANGUAGES

English	Native
French	Advanced (B2)

CERTIFICATIONS

- Building RAG Agents with LLMs (Ongoing)
- Google IT Support Professional Certificate (2024)

PROFILE

Computer Vision Engineer specialized in designing real-time vision systems for embedded and industrial environments. Expertise in multi-camera vision, multi-object tracking and 3D localization, model acceleration (TensorRT, FP16/INT8) and integration with industrial PLCs

PROFESSIONAL EXPERIENCE

Computer Vision Engineer
Mar 2026 – Sept 2026

Isitec International Millery, Lyon 69390

- Developed a real-time multi-camera perception system (~60 FPS) for 2D/3D parcel tracking and AGV communication.
- Tooling: built isiCal (guided ChArUco/Multical calibration) and isiGen (auto-annotated synthetic data via SDXL/SAM2).
- IsiDetector: conveyor parcel segmentation (mAP@50 ≈ 0.96), FP16/INT8 compression, OpenVINO/TensorRT deployment + sorting PLC integration.

ML Engineer Intern
Feb 2024 – Jul 2024

WASORIA Le Creusot 71200

- NanoSAM image encoder: Vision Transformer (ViT) compression, distillation and TensorRT optimization on Jetson Orin Nano, +25% segmentation throughput and −40% inference latency.

Senior IT Operations & Web Administrator
Jan 2013 – Feb 2023

Radio Nigeria Ikoyi, Lagos

- Managed IT infrastructure and digital operations supporting 300+ workstations, overseeing systems administration, networking, security, web administration and process automation.

EDUCATION

MSc in Computer Vision and Robotics
August 2024

Université de Bourgogne

MSc in Artificial Intelligence for One Health
August 2026

Université Grenoble Alpes (UGA)

Postgraduate Diploma in Computer Science
May 2015

University of Lagos

PROJECTS

IsiMonitor 3D – Industrial Vision
2026

`GStreamer` `ONNX Runtime` `MQTT`

Multi-camera 2D/3D tracking for real-time warehouse digital twins, with automated camera calibration (isiCal) and synthetic data generation (isiGen).

IsiDetector – AI Parcel Detection & Sorting
2026

`YOLOv26/RF-DETR` `TensorRT/OpenVINO` `ByteTrack` `Docker`

Real-time conveyor parcel detection and segmentation (mAP@50 ≈ 0.96), FP16/INT8 optimization and PLC sorting integration.

ROSBot Harmony – Autonomous Robotics
2024

`C++` `RTAB-Map` `ROS 2` `MoveIt` `PyTorch`

Autonomous navigation, Visual SLAM, multi-robot coordination and motion planning.
